

# FX 928 RAPID-SETTING Mortar is Utilized to Patch Concrete Potholes on Bridge Deck on Maryland Route 194

www.foxind.com **FN-195**

Fox Industries, Inc. • 3100 Falls Cliff Road • Baltimore, Maryland 21211

Potholes are squared off and deteriorated concrete is removed.

FX-928 is packaged in 50-lb. bags as shown by Douglas Fox, President, Fox Industries.

FX-928 is mixed in small portable mixer. Just add water and mix to desired slump.

FX-928 is mixed and poured out into pothole. It is self-leveling with no gas bubbles.

FX-928 is easily screeded by hand into place ready to finish.

Mr. Jim Brown, Maintenance Contract Supervisor of Maryland D.O.T., assures that reinforcing steel is in proper position before FX-928 is placed.

Mr. Ron Molesworth, Superintendent of Concrete General, Inc., repaired deteriorated sidewalk by skin patching with FX-928. He remarked that with the use of FX-928, the reduced amount of water was helpful when used in remote areas.

Mr. Carl W. Scheffel, Vice President & Chief Engineer of Fox Industries, checks FX-928 patch before opening lane to traffic. FX-928 achieves 2800 psi in compressive strength in one hour.
