

FOX PRODUCTS UTILIZED ON SOUTH AMERICA PROJECT

Rigail Productos & Servicios of Ecuador, South America, selects and recommends the use of Fox Industries FX-764 Hydro-Ester® Splash Zone, applied under water, and FX-498 Hydro-Ester® High Build Coating to protect concrete from further deterioration.

Overall view of bridge in Ecuador.

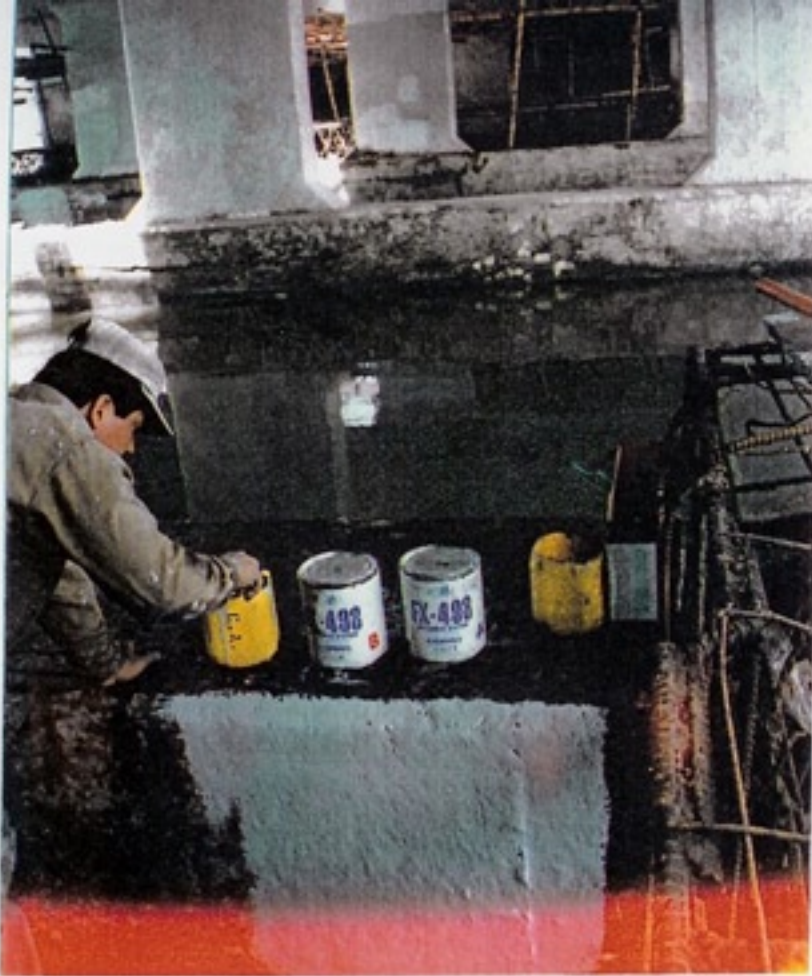

Surface preparation on under side of bridge.

Scrubbing with stiff broom prepares concrete before applying FX-498 Hydro-Ester® High-Build Coating at the tidal zone. FX-498 bonds tenaciously to damp concrete.

(OVER)

FX-498 Hydro-Ester®, 100% Solids, Water Insensitive Coating is being applied at the water line by brush.

Mixing of FX-764 Hydro-Ester® Splash Zone Epoxy is simple and easy. The 1 to 1 ratio material, after mixed, is lowered under water and applied to concrete.
