

Baltimore City Selects FX-460 Breathable Masonry Coating to Protect Windsor Mill Road Bridge Parapets

www.foxind.com FN-287

Fox Industries, Inc. • 3100 Falls Cliff Road • Baltimore, Maryland 21211

Windsor Mill Road Bridge over Gwynns Falls is revitalized using **FX-460 Breathable Masonry Coating**, Federal Color #27722, Beige

FX-460 is applied as two coat system consisting of primer and top coat.

Windsor Mill Road remains open to traffic while **FX-460** is applied.

A Flanigan employee sprays **FX-460**, as another checks on material. **FX-460** can be rolled, brushed or sprayed at 200-300 square feet per gallon.

Warranty: We warrant our materials to be of good quality and will replace any material proved defective. We believe that the technical information provided is reliable and that materials will perform to your satisfaction. However, we cannot guarantee final results because of the many possible variations in field conditions and application procedures.

FX-460 penetrates and seals, repels water, reduces efflorescence, prevents frost damage, and minimizes fungus growth.

FX-460 has a built in penetrant that protects concrete rebar from corrosion, but allows concrete to breathe. The coating-ability to breathe reduces spalling and peeling.

FX-460 is extremely durable. It is resistant to acid rain and solvent based cleaners. Dirt is easily removed.

The polymer make up of **FX-460** is UV resistant providing long lasting color retention.
